MESSAGE FROM NATIONAL PRESIDENT

Mr. Mihir Sanghavi

Dear Fellow RATAites,

First month of new committee has been full of enthusiasm, hard work and excitement. We had installation programs at Ahmedabad, Vadodara, Pune, Delhi and Indore, excellent programs by Delhi, Mumbai, Bangalore. Superb advocacy meeting with Labour Minister of Maharashtra Mr. Sachin Shinde which will go Long way at RATA for skill development.

Excellent initiatives by Manufacturing Forum and SSD Forums. This will really help our members and trade in general. We welcome 54 new members to our ever expanding RATA family. Special mention of Ahmedabad RRC whose excellent celebration of their 2nd local annual day was resounding success with 22 new members joining RATA family. Our trade grievances committee has already closed 4 pending cases and are working on couple of more. RATA has already started movement for uniform 45 days payment terms for better cash flow for trade so advocate the same to you fellow associates. Must applaud special efforts by all RRCs for contributing to the cause of the trade. Request all of you to please take advantage of being RATA member by being part of programs, generate business through RATA portal and Vyapaar Sanmelaan, reach out to your RRC for any trade related grievances and subscribe to various forums. Also would appeal to all of you to reach out to more members of HVAC&R trade and make them part of RATA family. Have a great month ahead full of smiles and high energy.

RNC : RATA National Committee

RRC : RATA Regional Committee

armacell® | AccoFlex® W

TOUGH & EASY-TO-INSTALL
CLASS 1 INSULATION MATERIAL

AccoFlex® W

- Class 1 fire classification to BS 476 Part 7
- Reliable condensation / sweat control
- Easy to install
- Tough & flexible insulation
- Smooth powdered inner surface for easy installation
- Non-corrosive on Copper pipes

Insulation installed on pipes of split ac systems, VRV/VRF and plumbing applications, to prevent condensation and reduce energy losses in light, commercial and residential (LCR) buildings.

At just
1% COST of
equipment, Insulation
is the simplest
way of reducing
energy costs

ACCOFLEX W
Saves upto **140x**
energy bringing
down the overall
costs

Mr. Harshal Padia
Secretary

EPTA is a large industrial group present over the five continents to meet the needs of commercial refrigeration for Retail, Food & Beverage, and Ho.Re.Ca; interpreting the consumer culture of different countries to give life to sustainable "cold technologies" of the future.

Through the 11 manufacturing facilities in Italy, France, UK, Turkey, China, Thailand, Argentina, and the USA, EPTA serves 100+ countries.

For more information, you can visit our website - www.eptarefrigeration.com/en

EPTA foresees India as one of the key markets for the next 5-10 years and hence plans to establish its *presence in India*. For this purpose, EPTA is looking for either:

- a PAN India **partner** that has marketing, sales, project installation and service capabilities along with sector experience and who is planning to expand its product portfolio
- suitable **distributors** or system integrators that cater to the retail sector and have a ready setup

You can reach our counterparts in India at

Forward Curved Series

Backward Inclined Series

Plug Fan

Centrifugal Fans

Double Inlet Double Width (DIDW) centrifugal blower with forward curved / backward inclined wheel. These fans are suitable for supply & exhaust application in commercial & industrial (HVAC) systems. Maximum operating speed and power of each fan type is due to its mechanical design. The operating limit of different fan types of FAFC/ FABI series is set according to the requirement of Class I, II & III limit as defined in AMCA Standard 99-16. Plug Fan (FAPF) are the Backward Inclined Centrifugal Fans which generally do not have the housing. It is known as Open Type Fan. Generally used in Pharma Industries, Fan Section.

We FanAir India Pvt Ltd as one of the leading and Pioneer Manufacturers, Engineers and Equipment & Service Providers of Air Management Equipments in the field of HVAC Industry & as a group company was incorporated in the year April 2003 as manufacturers of Complete Air Management Solution Products to carry forward the Ancestral tradition to stick to the technical trade/business/profession in one form or the other. Since then it has never looked back and has become a name to reckon with in the manufacturing of comprehensive range of Air Management Solution Products mainly pertaining to HVAC industry.

Fan Sections

FA FC double skin belt driven cabinet fan section is an ideal solution for supply & exhaust application including fresh air, exhaust air, make-up air, return air to deliver air capacity ranging from 1000 CFM to 40000 CFM. Our FA FC Series come with multiple air filter & discharge options.

Fan Section

Tube Axial Flow Fan H - Class

Tube Axial Flow Fan F - Class

Jet Fan

Axial Flow Fans

Axial fans as the name implies, move an airstream along with the axis of the fan. The air is pressurized by the aerodynamic lift generated by the fan blades, much like a propeller or an air plane wing. They have less rotating mass and are compact. They are frequently used in providing general ventilation, fume exhaust and removal of hot spots. Jet fans—also known as impulse or induction fans—support the natural flow between the supply air and extract air zones.

We are manufacturing Pre-Fabricated Ducts, Axial Flow Fans, Forward Curved Blowers, and Centrifugal blowers, Backward Curved Blowers, Plug Fan, Jet Fans, Smoke Exhaust, Kitchen Exhaust Unit, Wet Scrubber, Dry Scrubber, Air Washers & Air Curtains etc...
