

Breezer

Unique Air Supply Technology for Clean and Healthy Indoor Environments

Breathe Himalayan-Like Air Even in Central Delhi

Supply Ventilation is the Only Solution for Truly Safe and Comfortable Air

24/7 Ventilation

with windows closed

Clean Air

Filters out PM 2.5

No Odors

Protects from odors and harmful gases

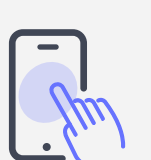

Blocks Allergens

Captures pollen, fluff, and animal dander

Noise Isolation

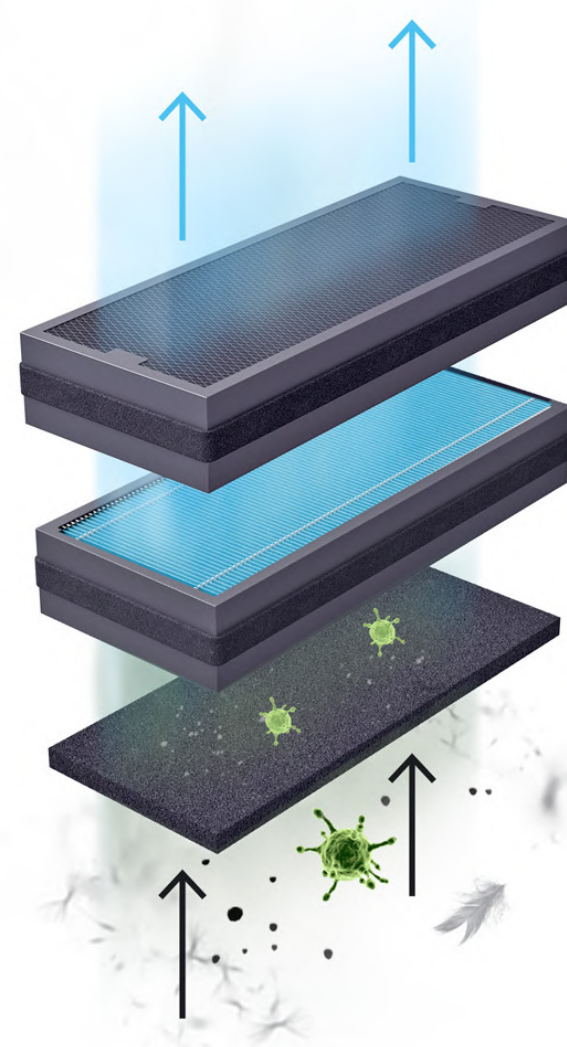

Cuts down on external noise

Easy Control

via the MagicAir mobile application

Three-Stage Filtration System for Air Purification and Disinfection

Adsorption filter

Ensures purification from outdoor gases, smoke, and odors

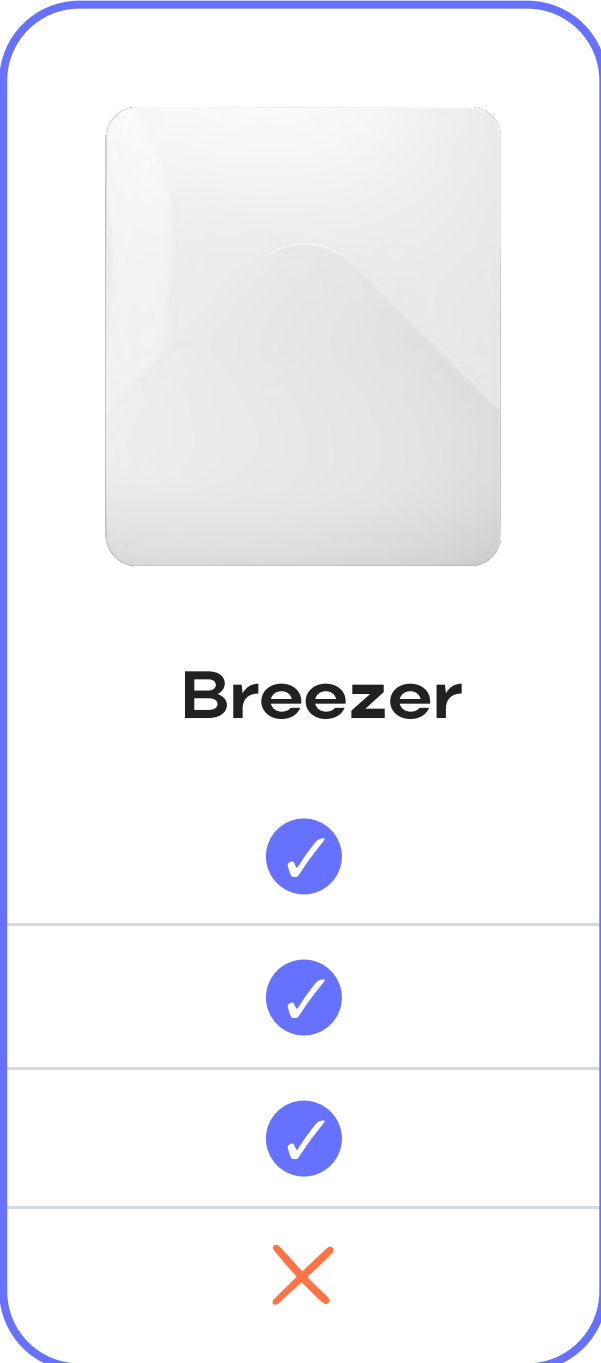

HEPA H13 filter

Traps fine dust particles (PM2.5, PM10) and allergens, equipped with an antimicrobial layer for inactivating germs with a 99.99% efficiency rate

G4 Primary Air Filter

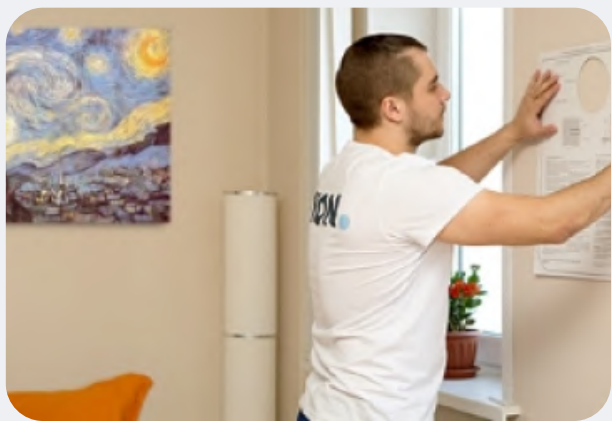

Captures coarse dust, soot, and fluff, acting as the first line of defense against pollutants

Breezer vs. Air Purifier & Air Conditioner

			
	Breezer	Air Purifier	Air Conditioner
Fresh air (CO ₂ /O ₂)	✓	✗	✗
Clean air (PM2.5, VOCs)	✓	✓	✗
Heating air	✓	✗	✓
Cooling air	✗	✗	✓

Swift and Clean Installation

within 1 hour

Step 1 – Spot selection

Time required: 10 min

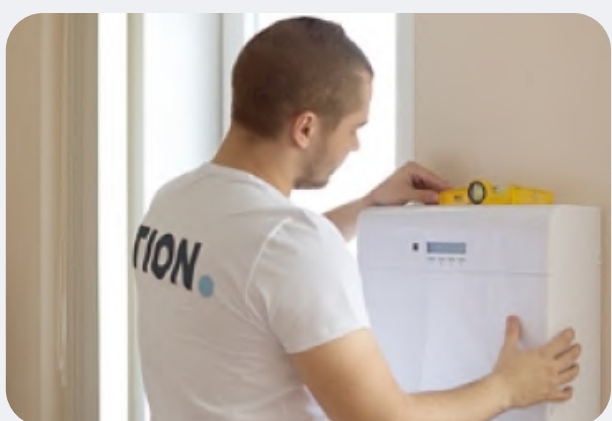

The Breezer can be installed under a window sill, near the air conditioner or by the side of a window. The remote controller allows the device to be placed under the ceiling.

Step 2 – Installation

Time required: 40 min

The installer uses a diamond drilling machine to drill the hole quickly and cleanly, without damaging the interior finish. The hole is heat- and noise-insulated and closed off with a decorative grille from the outside.

Step 3 – Plugging in

Time required: 10 min

The Breezer is mounted on the wall; the inlet of the device is tightly sealed to the air duct to eliminate drafts. The Breezer is plugged into an ordinary power socket.

Choose Breezer Best Suited for Your Needs

Breezer

- Fresh, clean air for 4-5 people
- Air flow rate: up to 80 cfm
- Three filters: G4 + HEPA H13 + Adsorption
- Remote control via smartphone

MagicAir Kit

- Fresh, clean air for 4-5 people
- Air flow rate: up to 80 cfm
- Three filters: G4 + HEPA H13 + Adsorption
- MagicAir base station included
- Automatic CO₂ control with MagicAir

MagicHome Kit

- Fresh, clean air for 4-5 people
- Air flow rate: up to 80 cfm
- Three filters: G4 + HEPA H13 + Adsorption
- MagicAir base station included
- Automatic CO₂ control with MagicAir
- IR Module for AC control
