WIRE MESH CABLE TRAY

MANUFACTURER AND SUPPLIER

Compact design, superior performance and attractive pricing are the key strengths PIONEER Trays are known for.

PIONEER Industrial Instruments is the market leader in the design and manufacture of Cable Trays of both Ladder and Perforated type.

Designed for robustness in long-span applications, PIONEER Industrial Instruments make Cable Trays are available in various dimensions i.e. length, width, height and thickness, as per precise customer requirements. And they are available in different Material of Construction like Steel, Aluminum and Stainless Steel.

For Cable Trays made from Steel, customers have a choice of material finish to select from; they come in Painted, Powder Coated, Pre-galvanized and Hot Dip Galvanized varieties. Furthermore, PIONEER Industrial Instrument offers you Hot Dip Galvanized Cable Trays as per IS / BS / ASTM / IEC Standards.

We also supply the complete set of accessories including vertical and horizontal bends, inside and outside bends, reduces and tees.

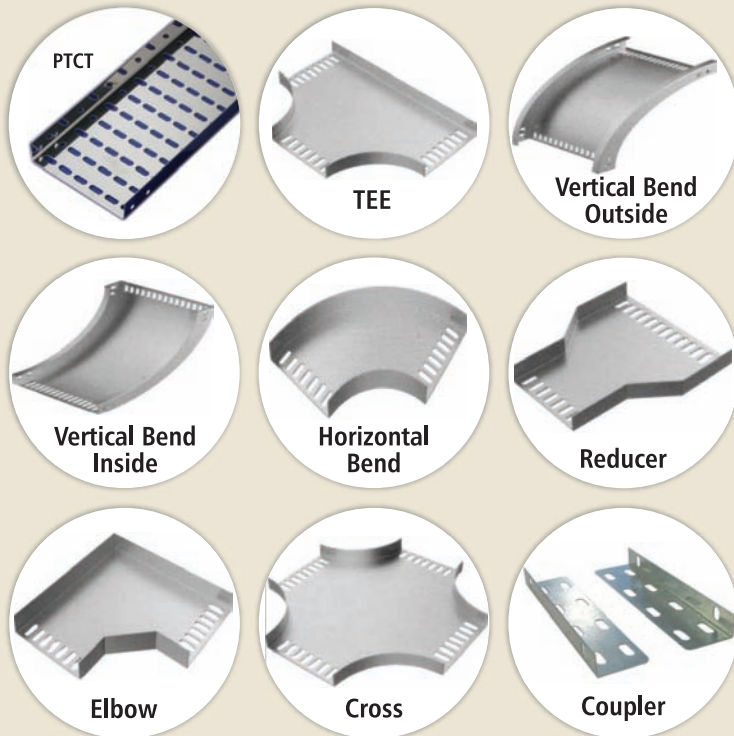

To complement its Cable Tray offering **PIONEER Industrial Instruments** supplies versatile Support Systems that are economical, fully adjustable and reusable. With no welding and drilling required, they are quite easy to install. These are best suited for multipurpose applications in Electrical, Instrumentation and Mechanical Systems.

Company Introduction

- Manufacturers with Capacity : 480 Tonnes Per Annum
- Standard length of cable trays 2500 mm
- Available in 1.6, 1.8, 2, 2.5, 3 mm thickness also custom made as per client requirement
- Made from hot rolled / cold rolled or aluminium sheets
- We ensure high quality of hot dip galvanising to ensure corrosion resistance as per IS specifications
- Our integenous cable support system is capable of withstanding dynamic load
- We provide accessories such as bends, elbows, reducers, risers, tees and cross to enhance flexibility of our cable support systems
- Suitable coupler, clamps, brackets and clamps ensuring proper and efficient installation

Perforated Type Cable Tray

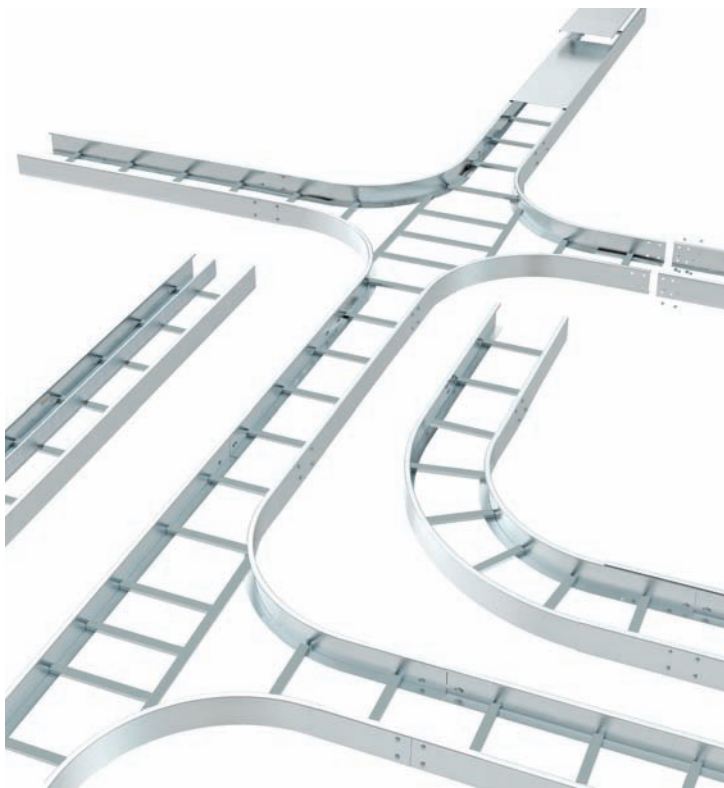

Features :

- Our cable tray helps in carrying cable through separate channels.
- Specifically meant for easy access of cables in case of repair or modifications.
- Not required drilling or welding and also can be quickly installed.

Specification :

- Perforated cable tray available with cover / without cover / with all accessories.
- Length : 2500mm / 3000mm
- Height : as per required
- Width : as per required
- Thickness : 18swg, 16swg, 14 swg, 12swg, 10swg etc.

Ladder Type Cable Tray

Features :

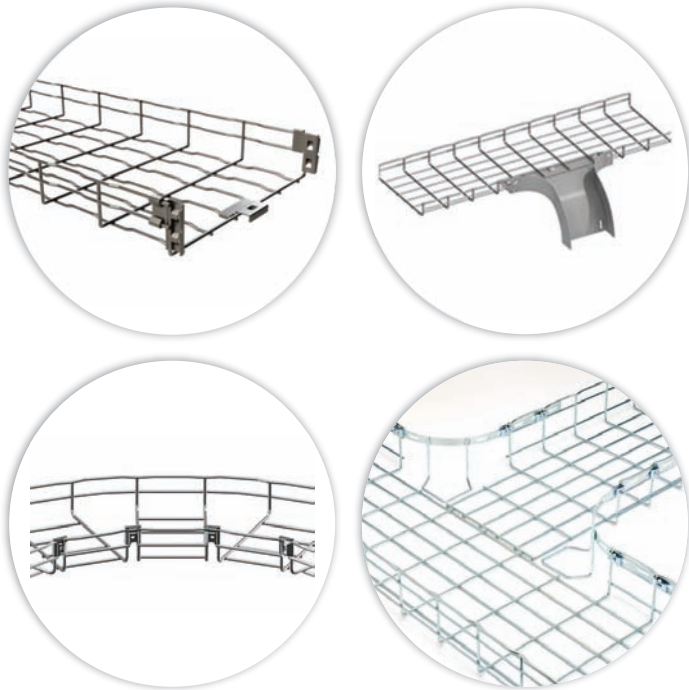

- Our cable tray helps in carrying cable through separate channels.
- High strength
- Easy installation
- Corrosion resistant
- Optimum quality

Specification :

- Ladder type cable tray available with cover / without cover / with all accessories.
- Length : 2500mm / 3000mm
- Height : as per required
- Width : as per required
- Thickness : 16swg, 14 swg, 12swg, 10swg etc.

Wire Mesh Type Cable Tray

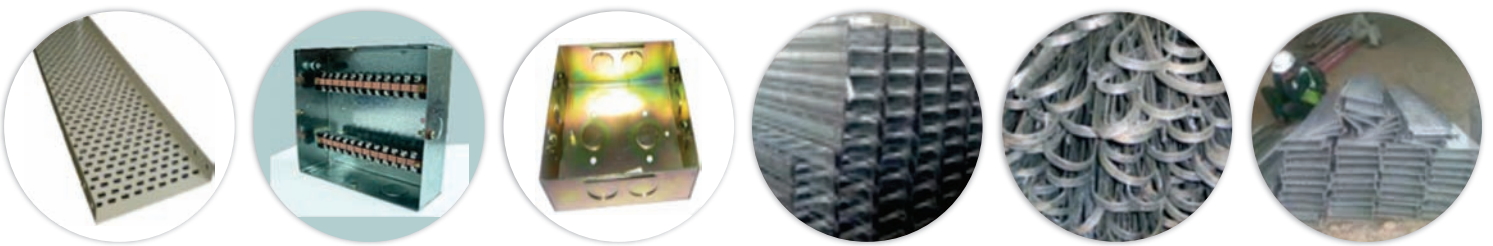

Features :

- Wire mesh cable tray is best solution for cable management especially for sensitive cable application.
- Easy to use between critical cable lines.
- Wire mesh cable trays lies in convenient mounting applying minimum accessories as well as excellent ventilation of the cable routing.

Specification :

- Length : 2000mm
- Height : 50mm to 150mm
- Width : 50mm to 600mm
- Thickness : 4mm, 5mm & 6mm etc.

Our Satisfied Customers

| MICROCOOL SYSTEMS | COMP ENGINEERING | OXYGEN AIR-CONDITIONING |
| ELM ENTERPRISES | NIKHIL COMFORTS | FUSION HVAC | ASHWINI KOOL | ENERGIA ENGINEERING |
